B. PROJECT VISION STATEMENT

The project shall be programmed, designed and executed in a manner so as to respect not only the local desert climate and regional elements, but also be identifiable as a College of the Desert educational building among the adjacent commercial car dealerships and other small businesses. Site planning is critical and will need to consider phased development of the site. The design of the project shall address functionality, efficiency, economy, flexibility, longevity, sustainability, low maintenance cost, aesthetics, useable outdoor spaces, way finding, and branding.

C. PROJECT BACKGROUND

The District intends to proceed with the programming, design, and construction of its **Roadrunner Motors Project** (Project), with an anticipated completion of December 2022. The new facilities will provide a regional workforce innovation center to support the academic, educational, and training needs of the program, with the goal of providing students the academic training tools required for 21st century jobs and careers in the Automotive Industry. The Project is to foster a collaborative learning environment, featuring a variety of instructional spaces to support the program.

Consistent with the College of the Desert's academic and facilities planning objectives – College of the Desert is working to acquire a 5.8 acre parcel located in Cathedral City, CA (see Attachment A, "Site Aerial") to be developed as a new Automotive Campus designed and constructed as a replacement facility for its existing Automotive and Advanced Transportation Program (Program) facility located at the Palm Desert Campus in Palm Desert, CA. The existing Program is robust with about 40 sections generating 170 FTES per year. This successful Program has an established 70% academic success bench mark, with an 85% student retention rate. The poor quality of the existing space and the paucity of space for the current and planned Program are limiting factors for program expansion and improvement. The Program includes course offerings that provide a general overview of the Automotive Industry discipline, as well as specific courses in steering, suspension, braking systems, automatic and manual transmission, air conditioning, electrical systems, engine performance and emission control systems.

The Project will include site development and infrastructure, on- and off-site utilities and energy sources, academic and instructional space, and operational support space.

It is envisioned that the new facility will provide amenities including:

- Up to 9 general and specialized classrooms
- Up to 5 teaching laboratory spaces (vehicle service bays), including one main laboratory with up to 12 lifts
- A small number of private offices and office support space
- An industry partner conference room
- Attention to green building design and healthy building design
- Auxiliary spaces including active storage, an electric charging station, and CNG alternate energy filling stations
- Parking for class vehicles (instructional program), as well as student and faculty parking.

The site is located near the largest concentration of automobile repair shops, parts stores, body shops, rent-a-car and auto dealers (12 dealerships) in the Coachella Valley; the site identified is zoned compatible with the Project's planned use.

The established construction budget for this project is \$14,000,000.

D. PROJECT OBJECTIVES

- Translate the District's vision for the Project into planning, programming, design and construction documents for the construction and long-term use of the Project site.
- Provide facilities and infrastructure that meet the District's immediate goals while providing for future expansion of the program.

- Support implementation of the District’s goals with regard to energy efficiency and carbon reduction as they translate to expectations of land resource commitments, optimizing development density, preserving open space and maintaining the operational efficiencies of utility infrastructure and circulation systems. The Architect will be required to incorporate universal sustainable design principles and related initiatives as may be applicable, including, but not limited to:
 - Desert Community Board Policy No. 3001 on Sustainability Stewardship;
 - California Community Colleges Board of Governors, Energy and Sustainability Policy;
 - California Proposition 39 and Prop 39 Implementation Guidelines (2014); and
 - United Nations’ 2030 Agenda for Sustainable Development and the US Green Building Council LEED program.
 - Zero Net Energy facility is desirable, and an aspirational objective of this Project.

E. EXPERIENCE REQUIREMENTS

- Expertise in successful execution of similar architectural services involving site development and design of instructional facilities for higher education, civic, or public use.
- Experience integrating infrastructure and utilities, open space, and principles of environmental stewardship and sustainability into a comprehensive Project design.
- Demonstrated ability to create a sense of mission, place and purpose for an owner, preferably for a campus or public purpose.
- Ability to establish and articulate project principles, goals, and performance criteria as developed in cooperation with District personnel and stakeholders.
- Ability to analyze existing site conditions on an infill/redeveloped suburban project site and provide appropriate design options that address the unique restraints of the same.
- Ability to incorporate institutional research data to inform the planning process, such as workload and utilization data and trends in higher education.
- Ability to recognize and assess local and regional factors that influence the development and use of a college or university campus, such as affordability, accessibility, capacity, density, aesthetics, District branding, transportation, and growth.
- Experience with fast-track projects executed in a public bidding environment.
- Familiarity with public contracts, public procurement and approval processes, and preferred experience working with higher education institutions in California.
- Experience managing the plan check process with the Division of the State Architect (DSA).
- Familiarity with California Environmental Quality Act (CEQA) as applicable to the development of capital improvements projects.

The Architect (including any designated sub consultants), specifically and including the primary staff proposed to provide the requested services, must demonstrate the breadth and depth of experience required, and must be supported by an appropriate secondary staff.

The Architect must demonstrate that their firm has operated as a business for a minimum of five (5) years, providing services in and related to Site Analysis, Site Development Planning, Physical Site Planning, Infrastructure Planning and Coordination, Architecture, Construction Administration and related disciplines. Principals and team leaders will each demonstrate a minimum of ten (10) years’ individual experience in the same.

The ideal Architect will have a sufficient depth of resources, with appropriate levels of experience to

accomplish the scope of work, including creation and submission of all deliverables, within a limited timeframe.

F. SCOPE OF SERVICES

The selected consultant will serve as the Architect of Record managing all disciplines and sub consultants, and will work under the direction of the District Bond Management office, along with District personnel. - FFE (including specialized equipment for automobile teaching programs)
- Close Out/Transition

It is envisioned that the project delivery method will be Design-Bid-Build Multiple Prime, however, that decision is subject to the District's final determination. Consultant shall be required to assist in reviewing and assessing proposed project delivery methods as part of their basic services.

The District will procure and provide additional background studies as necessary to facilitate design and engineering, including but not limited to surveys, geotechnical reports, soils studies, etc. Consultant shall be responsible for bringing to the District's attention any additional supplementary information which is critical to completion of the design phase.

Please note that, without limitation, all materials, data, reports, images, plans, digital and hardcopy files and the like shall become the property of the District, and all rights thereto shall be held solely by the District.

Each party shall be represented in such negotiations by an authorized representative with full knowledge of the details of the Claim or defenses being asserted by such party, and with full authority to resolve such Claim then and there, subject only to the District’s right and obligation to obtain Board of Trustees’ approval of any agreed settlement or resolution. If the Claim involves an assertion of a right or claim by a Sub consultant against Design Consultant that is in turn being asserted by Design Consultant against District, then such Sub consultant shall also have a representative attend such negotiations, with the same authority and knowledge as just described. Upon completion of the meeting, if the Claim is not resolved, the parties may either continue the negotiations or either party may declare negotiations ended. All discussions that occur during such negotiation and all documents prepared solely for the purpose of such negotiations shall be confidential and privileged pursuant to California Evidence Code Sections 1119 and 1152.

The award rendered by the Arbitrator(s) shall be final and binding upon the District and the Contractor and shall be supported by law and substantial evidence pursuant to California Code of Civil Procedure §1296. Any written arbitration award that does not include findings of fact and conclusions of law in conformity with California Code of Civil Procedure §1296 and Rule R-43 of the AAA Construction Industry Arbitration Rules shall be invalid and unenforceable. The District and Contractor hereby expressly agree that the Court shall, subject to California Code of Civil Procedure §§1286.4 and 1296, vacate the award if, after review of the award, the Court determines either that the award is not supported by substantial evidence or that it is based on an error of law. In connection with any arbitration proceeding commenced hereunder, the discovery rights and procedures provided for in California Code of Civil Procedure §1283.05 shall be applicable, and the same shall be deemed incorporated herein by this reference.
